PROJECT BACKGROUND AND SPECIFICATIONS

I BACKGROUND

The Town of Bennett ("Town") desires to solicit proposals from interested firms or persons to provide professional consultation on traffic and civil engineering design matters related to the proposed project entitled Kiowa-Bennett Road Safety Improvements ("Project"). This document sets forth general information and requirements for persons and firms ("Proposers") interested in submitting "Proposals" in response to this Request for Proposals ("RFP").

II PROJECT DESCRIPTION

This Project is located on Kiowa-Bennett Road with two major improvement areas: Kiowa-Bennett Road at Colfax Avenue Culvert and Sediment Control Improvements, and Kiowa-Bennett Road Open Space Culvert Replacement & Pedestrian Underpass, both located in Bennett, Colorado. The Town requires program development, design, engineering, permitting, cost estimating, construction document development, and related professional consulting services to support the required improvements to Colorado Department of Transportation (CDOT) requirements, and approval. The Project is funded jointly by the Town of Bennett, the FHWA HRRR HSIP program as administered by CDOT, and Arapahoe County Open Space. The project will need to take into account the Town of Bennett's current allocated budget and resources for the Project, to ensure affordability and proper construction scope. The Town has limited resources for the completion of this design and construction, and the selected consultant will be required to work with the Town Project Manager to stay within those boundaries. The Project will also require coordination with CDOT for standard project review and Department clearances for the FHWA HSIP funding. A positive working relationship and understanding of CDOT Region 1 inter-workings and key players will be essential to the success of the project. Preliminary improvement concept graphic exhibits are provided as an attachment to this RFP.

III SCOPE OF WORK

The Town seeks professional engineering design, contract document development, and consulting associated with the proposed infrastructure improvements.

1. Conceptual Design Review. Conceptual designs have been developed and need to be reviewed and utilized or adjusted as appropriate for the ultimate improvement design plans.
2. Environmental Permit Support Professional Services. The Town has engaged Tiglas Ecological Services (TES) to provide environmental and related professional services, analysis and deliverables towards attaining a Categorical Exclusion (Cat-X) for CDOT and FHWA Department clearances.
3. Professional Survey & Base Mapping Services. The Town has secured professional survey services for boundary & right-of-way/easement from Frane Surveying, and topographic site survey and base mapping from Daley Surveying, including Level QL-C initial utility locates.
4. Design Support Professional Services. As a part of their Proposal, the selected consultant shall be responsible to procure or provide professional consulting services regarding geotechnical analysis and pavement design, stormwater drainage & management design including sediment control, structural design including culverts, retaining walls and bridge rails or guardrails,

roadway geometric design, pedestrian underpass electrical and lighting design, and related project impact investigations typical of CDOT and FHWA projects.

5. Utility Locate Services. The Town of Bennett would procure or provide additional utility locate support services indicated or required, including pot-holing.
6. Improvements Design. The selected consultant will provide final design construction plans, and complete bid and contract documents, in a format acceptable to the Town and CDOT. The designs and contract documents will be according to Town of Bennett and CDOT Standards and Specifications.
7. Right-of-Way and Easement Acquisition Exhibits. The consultant shall identify required right-of-way and easement acquisitions, including construction easements, as early in the design process as practical. The Town will be responsible for right-of-way and easement negotiations and acquisitions in conformance with CDOT and FHWA requirements.
8. Utility Conflict and Impact Analysis. The consultant shall identify required utility relocations and adjustments, including temporary, as early in the design process as practical. The Town will be responsible for utility provider coordination and permits.
9. Early and Long Lead Item Identification. The consultant shall identify any early- and long-lead order and delivery items, especially including specialty equipment and hardware.
10. Project Coordination. The project will require coordination and project management with the Town, other Town consultants, or consultants within the project design team, and applicable CDOT personnel. This will include coordination meetings and necessary related and support communications.
11. Review Comment Response. CDOT/FHWA will provide design review comments to address. Consultant will be responsible to address and respond to comments.
12. Final Deliverables. The Town expects as part of this process
 - Program confirmation document or Basis of Design Report, including project objectives, decisions & commitments, initial improvements roster, schedule projections, and budget estimate;

 - Opinion of Probable Cost (OPC) development throughout the design and plan process, for the Town's use with construction scope and budget compliance.
13. Construction RFP Process. The information provided will be utilized by the Town to formally procure construction proposals for the project at the completion of the design phase. The consultant will assist and support the Town through the Town construction RFP process, including
 - development of RFP documents with project description and scope,
 - proposal evaluation and scoring criteria,
 - detailed, itemized Schedule of Values,
